

IMPORTANT SUITE INFORMATION

Water

- The main shut-off valve is located either below your kitchen or bathroom sink, in your laundry room or in your kitchen pantry

Air Circulation

- Use exhaust fans when cooking or bathing
- Open your windows periodically

Filters

- Dryer lint trap: clean after each use
- Dryer exhaust ceiling lint trap: clean monthly
- Fancoil filter: clean every 3 to 6 months
- Hoodfan filter: clean when needed, it's dishwasher safe

Electrical

- If your kitchen or washroom plug stops working, reset the GFI button
- If your lights are flickering, change the light bulbs
- If your lamps are not working, check the switched receptacle
- If your circuit breaker trips, reset the circuit breaker

Tips when going on vacation:

- Keep your fancoil unit running
- Turn off main water shut-off valve
- Close and lock all windows and doors
- Inform your Property Manager
- Ask someone to visit your suite on a regular basis
