

Usha & Shivan

As requested in your Year End Report, the following clarifies the Water Shut-Off Valve Controls. At present, these are noted with marker on the "pipes" – we hope to find a more appropriate demarcation method.

Located in the HWT closet – top level

C1 – Cold Water Shut off – kitchen, main floor bathroom sink and toilet

C2 – Cold Water Shut Off – middle level bathroom

C3 – Cold Water Shut Off – washing machine

H1 – Hot Water Shut Off – kitchen, main floor bathroom

H2 – Hot Water Shut Off – middle level bathroom

H3 – Hot Water Shut Off – washing machine

M1 – Cold Water Manifold Shut Off

M2 – Hot Water Manifold Shut Off

T1 – HWT Intake

T2 – HWT egress

The small door at the top of the stairs, opens easily with a flathead screwdriver and allows access for HWT pilot and valves.
